

Vacation Manager

For organizations with Microsoft 365

Product information

The edcom Vacation Manager for Microsoft 365 was developed upon request of HR departments. It provides an important management tool. Here are the most important features for the company, the HR department, users and team leaders:

- **Close integration with the Microsoft world:** Simple user authentication via Microsoft 365. The selection of a substitute is done via the Azure Active Directory.
- In addition to standard leave accounts (annual leave and remaining leave), **special accounts can be freely configured**, e.g. for further training, parental leave, home office, business trips and more.
- Coordinated functions through a role-based concept for **users, team leaders, HR department and administrators. GDPR-compliant.**
- **Important planning tool for HR departments.**
- **Web application:** Easy access via all common browsers.
- Simple and clear design - **intuitive operation.**
- **Clear overview of the year:** An integrated calendar provides a quick overview of applications, absences and substitutions, also with detailed information.
- **Automatic entries** for requested and approved applications in the **Outlook calendar** as well as automatic entries for substitutions.
